DATABASE MIGRATION

Do you need help with migration of your SQL Server® database to Oracle®? Or your Sybase database to DB2® LUW? Are you worried about the migration path, feasibility of the migration, or expected downtime? If you are considering launching a database migration initiative or want to ensure the success of a current migration initiative, consider XTIVIA’s database migration services. We help you answer the following questions:

- Can it be done?
- How can it be done?
- What will it cost?
- How long will it take?
- What are the risks?

At XTIVIA, we pride ourselves in providing quality database migration services at the right price. When you work with XTIVIA, you receive:

- Accurate costing and sizing of the migration
- The expertise necessary to help control the risk associated with database and related application migration
- Cost effective database migrations
- Significant knowledge and experience in moving applications and associated database from one OS platform to another

APPROACH AND BENEFITS

XTIVIA uses the following approach for migrating databases:

Preliminary Analysis

- Initial discovery call with XTIVIA team to review requirements
- Complete technical questionnaire

Assessment

- Define the approach & plan
- Define the timeframe for a response
- Estimate schedule and cost

Migration

- Migrate applications, data and databases
- Integrate middleware
- Test and validate
- Deploy
- User Acceptance

XTIVIA supports these core migration platforms along with others:

<table>
